

OLGA SANGUPAMBA NIKA

Full-Stack Developer & UX/UI Designer · Master's student in New Information & Communication Technologies

Email olgasangupambanika@gmail.com

Phone 06 12 40 59 39

Location Montbéliard, France

I design and develop web and mobile applications end to end: back-end, front-end, database and user interface. Applied research is at the heart of my practice: understanding a user need through observation and interviews, prototyping, testing, iterating and documenting every step of the process. I already put this approach into practice during my UX/UI research internship. I remain open to projects designing digital solutions, in companies as well as in research labs.

SKILLS

- Full-Stack: React, Node.js, FastAPI, Python
- Mobile: KivyMD, Flutter
- Databases: PostgreSQL, SQLite, Redis
- UI/UX: Figma, prototyping, accessibility (WCAG)
- Research: UX Research and applied research in general, design thinking
- Digital project management
- Graphic design, video editing

LANGUAGES

- French — native
- English — B2

SOFT SKILLS

- Autonomy & organization
- Teamwork & communication
- Curiosity & creativity
- Rigor & analytical mindset

INVOLVEMENT

- Continuing education in project management, Project Management Institute (PMI RDC)
- Volunteer, UNICEF France

INTERESTS

- Video editing & visual content creation
- Photography
- Working with people

EXPERIENCE

UX/UI Design Research Intern

Université Catholique du Congo

2025

- Conducting user studies (interviews, usability testing) to improve the experience of university digital tools
- Prototyping interfaces in Figma and iterating on mockups based on user feedback
- Contribution to an applied research project in human-computer interaction, and documentation of the methodology used

IT Intern

Société Nationale d'Électricité (SNEL RDC)

2024

- Involvement in deploying digital solutions and first-level technical support
- Analysis of common incidents, writing technical documentation and technology watch

Computer Science Teaching Intern

Final-year high-school class (Terminale)

2024

- Leading introductory computing sessions for final-year students
- Designing teaching materials and explaining technical concepts clearly

Communications Officer

Project Management Institute (PMI RDC)

2023 – 2025

- Designing visual and promotional materials through graphic design and clear messaging
- Organizing conferences and coordinating event logistics, from preparation to delivery
- Managing internal and external communications: clear content tailored to different audiences
- Monitoring and analyzing communication performance, and proposing improvements

EDUCATION

Master 2 NICT — Multimedia Products & Services track

Université de Franche-Comté, Montbéliard

2025 – 2027

Mobile development, multimedia storytelling, interactive design

Master's in Network Administration

Université Catholique du Congo

2023 – 2025

Project management, Internet of Things, network administration

Bachelor's in Computer Science

Université Catholique du Congo

2021 – 2023

Web development, information systems, cybersecurity
